- TV/DVD/MP3 Player
- Dedicated Storage: 1645L. Please note, this does not include on top of or beside the bed or on the floor area

The *C3* comes standard with the *Darche Eclipse 270° Awning* for comprehensive weather protection within minutes

CONSTRUCTION

The awning and walls are constructed using a hard-wearing proofed 260gsm poly cotton ripstop canvas. The frame is a Aluminium box extrusion with steel hardware. The transit cover is constructed using laminated 600gsm PVC.

AREA OF SHELTER

The awning alone covers 11.5m²

With walls fitted (optional), the set up covers approx. 20.5m².

ADDITIONAL POLES INCLUDED

3x pivoting alloy telescopic poles are included and purposely fitted under awning arms for easy access and stowing. Each rafter has a purpose drilled hole for additional supplied spigot poles.

UNIQUE POINT OF DIFFERENCE

The Eclipse 270° Awning hinges from two sides, and also has a class leading larger coverage area as the front span runs along the front of the vehicle.

ADDITIONAL WALL USAGE

With the use of Darche's Telescopic Alloy Poles 90-230cm (sold separately), both front walls (optional) are designed to be used as additional extendable awnings.

FREE-STANDING FUNCTIONALITY

It is designed to be a free-stander to aid in set up and pack down only, however we recommend that it is pegged down at all times. It has a large surface area, meaning sudden wind gusts could become hazardous. The Darche Eclipse 270° Awning has been designed for general camping use under normal conditions. Always ensure all guy ropes are anchored correctly. It may be necessary to re-adjust guy ropes and pegs at times to maintain the structural integrity of the awning.

Note: To avoid chances of personal injury and or property damage, Darche highly recommends the Eclipse 270° Awning should NOT be erected during windy conditions. Damage caused by wind and/or adverse weather will not be covered under warranty.

ONE-PERSON SETUP

The Eclipse 270° Awning is designed as a simple 1 person set up and pack down. Inclement weather may require the assistance of another person.

WATER RUN-OFF

Included guy ropes need to be fixed between rafters to create a water run off valley.

WARRANTY

2 Year factory warranty.
